

W- and WS- Options

The special drives of the series ZA-BSY+ and DXD-BSY+, as well as the applicable brackets can be now used with the W option (outdoors) and WS option (in the area of swimming pools). Enclosed you will find the most important changes for both options.

W- and WS- Options

Most important changes at a glance

	ZA-BSY+	DXD-BSY+	Brackets
  Valid for both options:			
» Gearbox and drive pinion are made out of stainless steel (V4A)	✓	✓	
» A special lubricant is used as corrosion prevention at the surface of drive board and motor	✓	✓	
 W – Option			
» Pressure compensation drilled hole (depends on installation)	✓		
 WS – Option			
» All steel parts are exchanged with stainless steel parts	✓	✓	✓
» All parts which cannot be exchanged, get a special lubrication which prevent the corrosion	✓	✓	✓
» All brackets and small parts which are used, have to be covered with a special protection wax (Lusin)		✓	✓
» There has to be a half-yearly service which is to be done by an authorized Service and Sales Partner. This is based on a signed service contract with service protocols. A list with Service and Sales Partners can be found at: www.dh-partner.com
