

## Position: **Design/Quality Engineer**

FFI is seeking a Design/Quality Engineer to join our company based in Los Angeles. The Design/Quality Engineer will be responsible for taking the lead on new product designs, product revisions, quality control and technical document control. This position will work closely with the FFI Management team to ensure company product development plans are met, and will have input and participation in strategic planning.

### **Skills and experience FFI is seeking:**

- Product Design and Project Management experience required.
- Bachelor's degree in Mechanical Engineering or Industrial Design required.
- Expert computer skills, including MS Office and 3D and 4D CAD or SOLIDWORKS software.
- Knowledge/design of hardware, gasketing, mechanisms and fasteners will be needed.
- Knowledge of manufacturing processes, such as: machining, forging, stamping, die-casting, extruding, injection molding, painting, plating, assembly, inspection, quality control.
- Experience with manufacturing of doors, windows, skylights, curtain wall, and/or metal extrusions is highly preferred.
- Familiarity with Quality Assurance, Quality Control and FEMA analysis.
- Excellent communication skills – in person, on phone and written.
- Must have ability and desire to travel frequently, including overseas.
- Language skills: fluent in Korean **and** English.
