

# RE-KEYABLE PROFILE CYLINDERS

## Features and Benefits

- brass cylinders; in popular finishes: oil-rubbed bronze, brass and satin nickel.
- FFI re-keyable cylinders have Schlage C-keyway profile.
- special keying options available on request.
- FFI has a very low profile thumbturn knob, which projects out only 11/16" (16.5 mm); compare to 30mm or more protrusion for other cylinders.
- order 5mm machine screws separately.

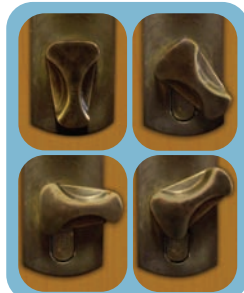

with thumbturn knob & premium keys

### FFI Thumbturn Knob Design Advantages

1. smaller, more attractive knob.

2. low profile knob neatly conceals cylinder behind it.

3. knob clicks firmly into resting position.

Polished Brass

Oil-Rubbed Bronze

Satin Nickel

### 63mm knob and key cylinders

- use for 56mm (2-1/4") thick lift slide panels with FFI's LS100, LS200 or LS300 handles
- also use for 1-3/4" doors, with handles with 10-12mm thick escutcheon

part #	description	cylinder length	finish
LS100.10.605	cylinder, knob+key	63mm (31.5/31.5)	polished brass
LS100.10.613	cylinder, knob+key	63mm (31.5/31.5)	oil-rubbed bronze
LS100.10.619	cylinder, knob+key	63mm (31.5/31.5)	satin nickel

### 76mm knob and key cylinders

- use for 68mm (2-3/4") thick lift slide panels with FFI's LS100, LS200 or LS300 handles
- also use for 2-1/4" doors, with handles with 10-12mm thick escutcheon

part #	description	cylinder length	finish
LS100.12.605	cylinder, knob+key	76mm (38/38mm)	polished brass
LS100.12.613	cylinder, knob+key	76mm (38/38mm)	oil-rubbed bronze
LS100.12.619	cylinder, knob+key	76mm (38/38mm)	satin nickel

### 100mm knob and key cylinders

- use for 68mm (2-3/4") thick lift slide panels with lift slide handles with 12-14mm escutcheons

part #	description	cylinder length	finish
LS100.30.605	cylinder, knob+key	100mm (50/50mm)	polished brass
LS100.30.613	cylinder, knob+key	100mm (50/50mm)	oil-rubbed bronze
LS100.30.619	cylinder, knob+key	100mm (50/50mm)	satin nickel
