

# RQ Bridge 232

**RQ Bridge translator for most BMS with RS232 protocol, or for PC programming. Use with RS-232 adaptor accessory sold separately.**

Bi-directional Serial Bridge to communicate between Home Automation systems and RQ motor controls via RS-232 using ASCII strings.

The RQ Bridge 232 is powered by the RQ Bus, 5VDC.

Up to 98 intermediate positions available with RQ commands.

Up to 62 scenes can be programmed and each can be activated with a single RQ command.

Small physical size allows for easy installation on every project.

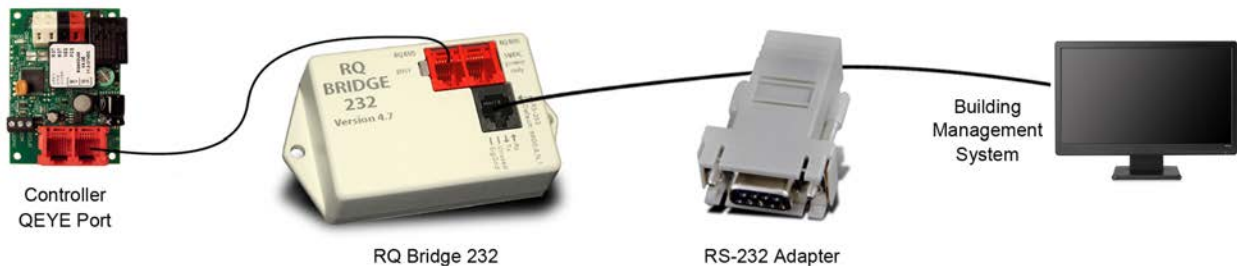

Allows building automation systems like Crestron, AMX, Vantage, Control4, HAI, and others to query the RQ60AUMH 115 and RQ60AUMHE 230 motor controls for position and other status features.

CE rating; in plastic housing.

## RS-232 Adaptor

Female DB-9 style (DE-9) to 6P4C adaptor for RQ BRIDGE or R2D7 interface. Compatible with most automation systems and PCs.
