

## Applications

- Connects to AFI DC actuators by connecting to AFI power supply panel (ask for datasheets)
- Must be pre-wired for reverse polarity
- Install in common single gang wall box (not included)

## Key Features

- Maintained Contact, DPDT (Double-Pole, Double-Throw), center off, commercial grade switch
- Back and side wiring terminals accept solid or stranded wire as appropriate for installation
- Maintained Contact means the switch maintains intended function until physically pressed into the off position.
- With DC motors, connect through an AFI Power Supply Panel
- UL Listed (file #E-7458), CSA Certified (file #LR-3413), NOM Certified (#047)
- Ten-year Leviton limited manufacturer's warranty
- Decora wall plate not included; install in a common single gang wall box
- Color: White

## Specifications

Power Input	Up to 120VAC
Amperage Rating	15A*
Safety Marks	UL Listed, NOM Certified
Operating Environment	-40° to 120°C
Dimensions	1.3" x 4" x 1.42"

\* Do not exceed 80% of switch maximum capacity (12A).

## Order Guide

Part #	Description
SW5686-2W	Switch - Maintained Contact Double-Pole, Double-Throw (DPDT), Center Off
