greenteQ Inline Sliding Patio Door Pull Handles

The standard greenteQ Alpha Patio Pull Handle, or P-Handle, sits alongside its Coastline stainless steel stable-mate as our premier handle range for inline sliding patio doors. The two handles have the same fixing centres so are easily interchangeable when required (e.g. when a stainless steel product is desirable in a coastal installation).

The Alpha P-Handle shares many of the design elements of the other residential door and window furniture within the greenteQ Suite, including the decorative greenteQ groove on the backplate. The greenteQ Suite allows installers to tie together a whole house installation across resi-doors, windows and many styles of patio doors, including inline sliders.

Alpha P-Handle is available from stock in white, black, antique black, PVD gold, polished chrome, satin chrome, smokey chrome and our exclusive Enduro Steel finish. It is available with or without a profile cylinder hole, and without an operating lever, i.e. with pulls only. There is also a completely blank backplate available.

The operating lever is sufficiently long to provide enough leverage to smoothly operate patio door locks with multiple hook locking bolts.

Alpha P-Handle has 92mm centres and is suitable for use with a number of patio locks including the greenteQ Clearslide, Yale Patio Lock and Roto's 1800 Series.

The handing of the pull is easily reversed so stock holding is kept to a minimum.

Benefits at a glance:

- Part of the greenteQ Suite
- Available in 8 attractive finishes
- Fits many lock brands, including greenteQ, Yale and Roto
- Interchangeable with the Coastline stainless steel handle
- Long operating lever for smooth lock operation
- Suits 40-70mm door thickness
- With or without cylinder hole, and other 'specials' available
- Easy to reverse the handing
- 10 year greenteQ performance guarantee
- Q-secure PREMIUM approved product
