greenteQ

greenteQ Aspire Suite Lift/Slide Door Furniture

greenteQ Aspire is a top quality hardware suite consisting of handles and finger pulls for aluminium, timber and PVCu lift/slide doors.

Depending on the product finish, the base material is either grade 304 stainless steel or zinc. The grade 304 stainless steel versions are finished in polished or brushed stainless steel, PVD gold, satin chrome and brushed graphite, whilst the zinc products are painted silver (Window Grey RAL 7040), black, anthracite grey and white.

The 250mm lever provides plenty of leverage to drive the mechanism on the sash. This is important when you consider that lift/slide sashes can be up to 3335mm wide and weigh up to 400Kg depending on the gear used. A strong spring gives positive location in the 'closed' and 'slide' positions to further aid smooth operation.

The soft lines of the lever not only look great but make Aspire very comfortable to use. This 'soft' look is carried over to the handle backplate which features rounded ends. This also brings Aspire in line with the rounded backplate of the greenteQ Alpha and Coastline residential door handles.

Aspire handles are available with or without a profile cylinder hole and can be used either on the inside of the door only, or can be through-fixed back to back to provide internal/external access.

If using the handle on the inside only, there is the option to through-fix into a finger cup (finger pull) on the outside of the door to enable the user to slide the sash easily. Alternatively, the outside of the door can be left blank.

All spindles and screws are to be ordered separately and must be selected according to the choice of handle application.

We also offer a hi-grip version where the lever stands an extra 11mm away from the sash to give additional clearance.

Benefits at a glance:

- Operates large & heavy lift/slide doors with minimal effort
- Positive location for further ease of use
- Attractive soft lines
- Comfortable feel when in use
- Can be used on inside only, with external finger cup, or as a back to back pair for internal and external operation
- Available with or without profile cylinder hole
- Hi-Grip version for extra clearance
- 9 attractive finishes including brushed and polished stainless steel
